

Alpha Men's Clinic

Luxury Wellness Peptide Therapy

Enhance Vitality • Restore Balance • Elevate Performance

What Are Peptides?

Peptides are short chains of amino acids—the building blocks of proteins—that signal and support natural biological processes. They help optimize metabolism, repair tissue, promote muscle growth, and restore hormonal balance. At **Alpha Men's Clinic**, our premium peptide therapies are designed to help you feel, look, and perform at your best.

Individual Peptides

Adipotide-FTPP

Targets fat cells and promotes their natural breakdown to support body recomposition and weight management.

AOD-9604

Assists in fat metabolism by enhancing lipolysis and reducing fat accumulation—supporting a leaner physique without affecting blood sugar levels.

BPC-157

Promotes rapid healing of muscles, tendons, and ligaments. Known for its tissue repair and gut health benefits.

CJC-1295 (No DAC)

Stimulates growth hormone release for improved recovery, lean muscle gain, and better sleep quality.

DSIP (Delta Sleep-Inducing Peptide)

Supports deep, restorative sleep while reducing stress and regulating cortisol levels.

Epithalon

A longevity peptide that supports healthy cell regeneration, anti-aging, and improved energy balance.

Follistatin

Inhibits myostatin to promote muscle growth and increase strength potential.

GHK-Cu

A copper peptide that rejuvenates skin, supports hair regrowth, and promotes collagen production.

Gonadorelin

Stimulates natural testosterone and LH production, supporting hormonal balance and fertility.

IGF-1 LR3

Enhances muscle growth, recovery, and fat metabolism by extending the effects of growth hormone.

Ipamorelin

A gentle growth hormone secretagogue that supports recovery, energy, and improved body composition.

Kisspeptin

Promotes natural testosterone production and supports reproductive hormone regulation.

KPV

A potent anti-inflammatory peptide that supports immune health, gut healing, and overall wellness.

LL-37

Supports immune defense and cellular repair, aiding wound healing and antimicrobial protection.

Melanotan-II

Encourages natural tanning while supporting libido and mood enhancement.

MOTS-C

A mitochondrial peptide that boosts metabolism, energy, and endurance—promoting cellular vitality.

NAD+

Supports cellular energy, mitochondrial repair, cognitive function, and anti-aging benefits.

Oxytocin

Known as the “bonding hormone,” it promotes emotional well-being, connection, and sexual satisfaction.

PT-141

Enhances libido and sexual performance in both men and women, working independently of testosterone levels.

Selank

Reduces anxiety, enhances focus, and supports cognitive balance without sedation.

Semax

Improves memory, focus, and mental clarity while reducing stress-related fatigue.

Sermorelin

Stimulates natural growth hormone production to support vitality, muscle tone, and restful sleep.

SS-31

A mitochondrial peptide that protects cells from oxidative damage and supports energy production.

TB-500 (Thymosin Beta-4)

Accelerates tissue repair, reduces inflammation, and enhances recovery after physical stress.

Tesamorelin

Reduces visceral fat and improves metabolism by increasing natural growth hormone levels.

Thymosin Alpha-1

Strengthens immune response and promotes cellular repair for enhanced resilience.

Peptide Blends

BPC-157 + TB-500

A synergistic recovery blend for advanced tissue healing, joint support, and reduced inflammation.

BPC-157 + TB-500 (15mg/15mg)

Enhanced formulation for accelerated repair and high-performance recovery.

BPC-157 + TB-500 + GHK-Cu

Combines repair, rejuvenation, and collagen support—ideal for anti-aging and joint health.

CJC-1295 + Ipamorelin

Promotes natural growth hormone release to improve sleep, recovery, and body composition.

DSIP + Selank Blend

Combines relaxation and focus for stress relief and improved emotional balance.

GHK-Cu + Epithalon

A restorative blend that supports skin renewal, collagen synthesis, and longevity.

GHK-Cu + Epithalon + MOTS-C

Combines anti-aging and mitochondrial support for full-body cellular rejuvenation.

IGF-1 LR3 + MOTS-C

Supports muscle growth, metabolism, and recovery through synergistic metabolic activation.

Ipamorelin + CJC-1295 + IGF-1 LR3

Comprehensive performance blend enhancing strength, recovery, and vitality.

Semax + Selank + DSIP

Balances focus, calm, and restorative sleep—supporting optimal cognitive and emotional function.

TB-500 + BPC-157 + GHK-Cu + KPV

Advanced healing and anti-inflammatory blend for recovery, gut health, and skin rejuvenation.

Tesamorelin + Ipamorelin + MOTS-C

Optimizes fat metabolism, muscle tone, and energy through advanced growth hormone support.

Thymosin Alpha-1 + KPV + LL-37

Immune and repair powerhouse—supports healing, inflammation control, and infection defense.

Discover Your Personalized Wellness Plan

At **Alpha Men's Clinic**, we specialize in personalized peptide protocols designed to optimize performance, recovery, and vitality.

Consult with our medical professionals to craft your tailored peptide regimen.
