How To Use This Catalog

This catalog is the complete clinical and educational reference for the Alpha Men's Clinic peptide formulary. Every product profile is built to serve three purposes — a clear instruction sheet for patients reconstituting and dosing their vials, a shopping catalog showing your Alpha Men's price next to the typical clinic-tier average, and a clinical reference for our staff and partner providers.

- 1. Read the profile.** Each peptide page covers what it is, how it works, who it's for, and the headline benefits.
- 2. Reconstitute correctly.** Use only sterile bacteriostatic water. Each profile lists vial size, water volume, and the dose in insulin-syringe units. Swirl gently — do not shake.
- 3. Dose with an insulin syringe.** All subcutaneous peptides are dosed in syringe units (1 unit = 0.01 mL on a U-100 syringe). Inject into clean abdominal or thigh tissue.
- 4. Store properly.** Refrigerate reconstituted peptides at 2–8°C. Most are stable 21–30 days reconstituted; lyophilized vials store longer per label. Keep away from light and heat.
- 5. Stack strategically.** The signature stack protocols at the back of this catalog combine peptides for fat loss, recovery, longevity, sexual health, cognition, and aesthetics.
- 6. Stay supervised.** All therapies are prescribed and monitored by Alpha Men's Clinic providers. Report side effects promptly and follow your titration schedule.

RECONSTITUTION PRIMER

Insulin syringes are graduated 0–100 units = 0.0–1.0 mL. To convert any dose: **Units = (Dose in mg ÷ Vial size in mg) × (Reconstitution volume in mL × 100)**. Example: 5 mg BPC-157 vial reconstituted with 2 mL bacteriostatic water → 250 µg dose = $(0.25 \div 5) \times 200 = 10$ units.

What's Inside

Complete Peptide Profiles	All 45 SKUs — overview, benefits, reconstitution, dosing, and pricing.
Weight Loss & Metabolism	Semaglutide, Tirzepatide, Retatrutide, Cagrilintide, AOD-9604, Adipotide.
Muscle, Recovery & GH Axis	CJC-1295, Ipamorelin, Sermorelin, Tesamorelin, IGF-1 LR3, Follistatin.
Healing & Tissue Repair	BPC-157, TB-500, KPV, GHK-Cu.
Longevity & Cellular	Epithalon, MOTS-C, NAD+, SS-31.
Sexual & Reproductive Health	PT-141, Kisspeptin, Gonadorelin, Melanotan-II, Oxytocin.
Cognitive & Mood	Selank, Semax, DSIP, Dihexa.
Immune & Anti-Inflammatory	Thymosin Alpha-1, LL-37.
Signature Blends	Premium stacked vials — recovery, longevity, performance.
Top 10 Stack Protocols	Revenue-engineered combinations for transformation, longevity, and performance.
Wellness & Performance Stacks	Curated bundles for executive performance and men's health.
Compliance & Disclaimers	Required notices and educational scope.
Contact	How to reach the clinic for orders and consultations.

SECTION 03

Complete Peptide Profiles

Forty-five SKUs grouped into clinical categories. Each profile covers what the peptide does, how to reconstitute it, the typical dose, and how Alpha Men's pricing compares to clinic-tier averages.

PEP-002 Adipotide

Weight Loss • 10mg

ALPHA MEN'S

\$400

OVERVIEW

Targeted peptidomimetic that selectively prunes adipose vasculature, driving rapid fat cell apoptosis in research models.

KEY BENEFITS

- ▶ Aggressive adipose reduction
- ▶ Targeted mechanism
- ▶ Used in supervised short cycles

RECONSTITUTION & DOSING

VIAL SIZE	10 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	AM
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Supervised advanced fat-loss protocols only.

VIAL SIZE 10mg	ALPHA MEN'S PRICE \$400	COMPETITOR AVG \$499	PATIENT SAVINGS \$99 (20%)
--------------------------	-----------------------------------	--------------------------------	--------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-003 **AOD-9604**

Weight Loss • 5mg

ALPHA MEN'S

\$240

OVERVIEW

Modified fragment of human GH (176-191). Stimulates lipolysis and inhibits lipogenesis without affecting blood sugar or IGF-1.

KEY BENEFITS

- ▶ Targeted fat oxidation
- ▶ No impact on insulin/IGF-1
- ▶ Well-tolerated long-term

RECONSTITUTION & DOSING

VIAL SIZE	5 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	AM
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Men seeking adjunct fat-loss support without GH-axis impact.

VIAL SIZE 5mg	ALPHA MEN'S PRICE \$240	COMPETITOR AVG \$279	PATIENT SAVINGS \$39 (14%)
--------------------------------	--	---------------------------------------	---

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-010 Cagrilintide

Weight Loss • 5mg

ALPHA MEN'S

\$360

OVERVIEW

Long-acting amylin analog. Slows gastric emptying and reduces post-meal glucose — complements GLP-1 therapies and supports weight-loss plateaus.

KEY BENEFITS

- ▶ Enhanced satiety beyond GLP-1
- ▶ Post-prandial glucose control
- ▶ Synergy with retatrutide/tirzepatide

RECONSTITUTION & DOSING

VIAL SIZE	5 mg
RECONSTITUTION	2 mL
DOSE	Start 5 units and titrate up
FREQUENCY	3× per week
TIMING	AM
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Men looking to amplify GLP-1 or GIP/GLP-1 agonist outcomes.

VIAL SIZE 5mg	ALPHA MEN'S PRICE \$360	COMPETITOR AVG \$429	PATIENT SAVINGS \$69 (16%)
-------------------------	-----------------------------------	--------------------------------	--------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-043 Retatrutide

Weight Loss • 10mg

ALPHA MEN'S

\$350

OVERVIEW

Triple agonist (GLP-1/GIP/glucagon). Adds glucagon receptor activation for increased energy expenditure and lipolysis — the most aggressive fat-loss profile in peptide research.

KEY BENEFITS

- ▶ Highest observed fat-loss rates in peptide research
- ▶ Appetite suppression + increased energy expenditure
- ▶ Visceral/hepatic fat reduction
- ▶ Reserved for resistant cases

RECONSTITUTION & DOSING

VIAL SIZE	10 mg or 50 mg
RECONSTITUTION	1 mL or 5 mL
DOSE	12.5 units and titrate up
FREQUENCY	2× per week
TIMING	AM
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Severe obesity, metabolic syndrome, or plateaued on sema/tirz.

VIAL SIZE 10mg	ALPHA MEN'S PRICE \$350	COMPETITOR AVG \$599	PATIENT SAVINGS \$249 (42%)
--------------------------	-----------------------------------	--------------------------------	---------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-044 Retatrutide + Cagrilintide

Weight Loss • 10mg / 2.5mg

ALPHA MEN'S

\$200

OVERVIEW

Advanced weight-loss blend pairing triple agonist with amylin analog — the most aggressive combined metabolic protocol.

KEY BENEFITS

- ▶ Maximum appetite regulation
- ▶ Superior weight loss outcomes
- ▶ Reserved for resistant patients

RECONSTITUTION & DOSING

VIAL SIZE	10 mg / 2.5 mg
RECONSTITUTION	1 mL
DOSE	12.5 units and titrate up
FREQUENCY	2× per week
TIMING	AM
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Supervised advanced metabolic resets.

VIAL SIZE 10mg / 2.5mg	ALPHA MEN'S PRICE \$200	COMPETITOR AVG \$199	PATIENT SAVINGS Premium-tier
----------------------------------	-----------------------------------	--------------------------------	--

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-046 **Semaglutide**

Weight Loss • 5mg

ALPHA MEN'S

\$260

OVERVIEW

GLP-1 receptor agonist. Mimics native GLP-1 to slow gastric emptying, enhance central satiety signaling, and improve insulin sensitivity. The cornerstone metabolic agent for controlled, sustainable fat loss.

KEY BENEFITS

- ▶ Visceral and hepatic fat reduction
- ▶ Appetite suppression and reduced food noise
- ▶ Improved HbA1c and insulin sensitivity
- ▶ Cardiometabolic risk improvement

RECONSTITUTION & DOSING

VIAL SIZE	5 mg, 10 mg or 20 mg
RECONSTITUTION	2 mL per 5 mg
DOSE	Start 10 units and titrate up
FREQUENCY	1x per week
TIMING	AM
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Men 30–65 with BMI ≥27, metabolic syndrome, or stalled fat loss.

VIAL SIZE 5mg	ALPHA MEN'S PRICE \$260	COMPETITOR AVG \$329	PATIENT SAVINGS \$69 (21%)
-------------------------	-----------------------------------	--------------------------------	--------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-060 Tirzepatide

Weight Loss • 10mg

ALPHA MEN'S

\$340

OVERVIEW

Dual GIP/GLP-1 agonist. Activating both incretin pathways produces greater appetite, insulin, and adipocyte effects than GLP-1 alone — superior weight-loss outcomes in clinical data.

KEY BENEFITS

- ▶ Superior fat loss vs. GLP-1-only agents
- ▶ Strong appetite and cravings control
- ▶ Improved glycemic control and lipid profile
- ▶ Reduced NAFLD and liver fat

RECONSTITUTION & DOSING

VIAL SIZE	10 mg or 50 mg
RECONSTITUTION	1 mL or 5 mL
DOSE	12.5 units and titrate up
FREQUENCY	2× per week
TIMING	AM
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Men with BMI ≥30, metabolic syndrome, or plateaued on semaglutide.

VIAL SIZE 10mg	ALPHA MEN'S PRICE \$340	COMPETITOR AVG \$429	PATIENT SAVINGS \$89 (21%)
--------------------------	-----------------------------------	--------------------------------	--------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-012 CJC-1295

Longevity & Muscle • 5mg

ALPHA MEN'S

\$150

OVERVIEW

GHRH analog. Stimulates pituitary to release GH in natural pulsatile pattern — almost always stacked with Ipamorelin for synergy.

KEY BENEFITS

- ▶ Elevated GH / IGF-1
- ▶ Improved body composition
- ▶ Better sleep and recovery
- ▶ Collagen/tissue repair

RECONSTITUTION & DOSING

VIAL SIZE	5 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	AM or pre-workout
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Men 30+ focused on body comp, recovery, and sleep.

VIAL SIZE	ALPHA MEN'S PRICE	COMPETITOR AVG	PATIENT SAVINGS
5mg	\$150	\$189	\$39 (21%)

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-013 CJC-1295 + Ipamorelin

Longevity & Metabolism • 5mg / 5mg

ALPHA MEN'S

\$175

OVERVIEW

The gold-standard GH-axis blend. Synergistic GHRH + GHRP release produces natural, pulsatile GH elevation.

KEY BENEFITS

- ▶ Optimal GH pulse restoration
- ▶ Body composition and recovery
- ▶ Cornerstone of performance stacks

RECONSTITUTION & DOSING

VIAL SIZE	5 mg / 5 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	AM or HS
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

The foundational GH-axis protocol for men 30+.

VIAL SIZE 5mg / 5mg	ALPHA MEN'S PRICE \$175	COMPETITOR AVG \$279	PATIENT SAVINGS \$104 (37%)
-------------------------------	-----------------------------------	--------------------------------	---------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-017 **Epithalon**

Longevity • 10mg

ALPHA MEN'S

\$165

OVERVIEW

Pineal gland tetrapeptide (Ala-Glu-Asp-Gly). Supports telomerase activity, circadian regulation, and the hallmarks of aging.

KEY BENEFITS

- ▶ Telomere support
- ▶ Improved sleep/circadian rhythm
- ▶ Broad longevity effects

RECONSTITUTION & DOSING

VIAL SIZE	10 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	3× per week
TIMING	HS
DURATION	6 weeks once–twice/year (high-dose longevity protocol)
ROUTE	Subcutaneous

IDEAL CANDIDATE

Men 45+ committed to annual longevity resets.

VIAL SIZE 10mg	ALPHA MEN'S PRICE \$165	COMPETITOR AVG \$219	PATIENT SAVINGS \$54 (25%)
--------------------------	-----------------------------------	--------------------------------	--------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-018 Follistatin

Longevity & Muscle • 1mg

ALPHA MEN'S

\$350

OVERVIEW

Myostatin inhibitor. Supports lean mass gains and recovery by blocking the primary negative regulator of muscle growth.

KEY BENEFITS

- ▶ Myostatin inhibition
- ▶ Lean mass preservation/gain
- ▶ Recovery support

RECONSTITUTION & DOSING

VIAL SIZE	1 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	AM or pre-workout
DURATION	8 weeks on / 8 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Serious trainers seeking body recomp assistance.

VIAL SIZE 1mg	ALPHA MEN'S PRICE \$350	COMPETITOR AVG \$599	PATIENT SAVINGS \$249 (42%)
-------------------------	-----------------------------------	--------------------------------	---------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-025 IGF-1 LR3 + MOTS-C

Muscle, Recovery & Cellular • 1mg / 10mg

ALPHA MEN'S

\$350

OVERVIEW

Anabolic signaling + mitochondrial support. Ideal for men combining muscle goals with metabolic efficiency.

KEY BENEFITS

- ▶ Muscle hyperplasia + mitochondrial upgrade
- ▶ Enhanced nutrient partitioning

RECONSTITUTION & DOSING

VIAL SIZE	1 mg / 10 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	AM or pre-workout
DURATION	8 weeks on / 8 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Performance athletes with longevity goals.

VIAL SIZE 1mg / 10mg	ALPHA MEN'S PRICE \$350	COMPETITOR AVG \$479	PATIENT SAVINGS \$129 (27%)
--------------------------------	-----------------------------------	--------------------------------	---------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-026 **IGF-1 LR3**

Muscle & Recovery • 1mg

ALPHA MEN'S

\$350

OVERVIEW

Long-R3 IGF-1 analog with extended half-life. Promotes hyperplasia, recovery, and anabolic signaling in skeletal muscle.

KEY BENEFITS

- ▶ Muscle hyperplasia and recovery
- ▶ Enhanced nutrient partitioning
- ▶ Performance-oriented tool

RECONSTITUTION & DOSING

VIAL SIZE	1 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	AM or pre-workout
DURATION	8 weeks on / 8 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Advanced athletes or patients seeking direct anabolic support.

VIAL SIZE 1mg	ALPHA MEN'S PRICE \$350	COMPETITOR AVG \$429	PATIENT SAVINGS \$79 (18%)
-------------------------	-----------------------------------	--------------------------------	--------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-049 Sermorelin

Longevity • 5mg

ALPHA MEN'S

\$160

OVERVIEW

GHRH 1-29. The original, time-tested GH-axis peptide — gentle, predictable, and an ideal long-horizon longevity starter.

KEY BENEFITS

- ▶ Gentle GH restoration
- ▶ Better sleep and recovery
- ▶ Well-tolerated

RECONSTITUTION & DOSING

VIAL SIZE	5 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	HS
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Men new to peptides or preferring gentlest GH-axis entry.

VIAL SIZE 5mg	ALPHA MEN'S PRICE \$160	COMPETITOR AVG \$199	PATIENT SAVINGS \$39 (20%)
-------------------------	-----------------------------------	--------------------------------	--------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-054 **Tesamorelin**

Longevity & Metabolism • 10mg

ALPHA MEN'S

\$225

OVERVIEW

Potent GHRH analog originally FDA-approved for visceral adiposity. The most effective peptide for targeted visceral fat reduction.

KEY BENEFITS

- ▶ Targeted visceral fat reduction
- ▶ Improved lipid profile
- ▶ Elevated IGF-1 / lean mass
- ▶ CV risk factor improvement

RECONSTITUTION & DOSING

VIAL SIZE	10 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	HS
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Men 35+ with visceral adiposity or metabolic syndrome.

VIAL SIZE 10mg	ALPHA MEN'S PRICE \$225	COMPETITOR AVG \$399	PATIENT SAVINGS \$174 (44%)
--------------------------	-----------------------------------	--------------------------------	---------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-055 **Tesamorelin + Ipamorelin + MOTS-C**

Longevity & Metabolism • 10mg / 5mg / 10mg

ALPHA MEN'S

\$400

OVERVIEW

Visceral-fat-targeted GH optimization with mitochondrial support — powerful executive metabolic reset.

KEY BENEFITS

- ▶ Visceral fat targeting
- ▶ GH pulse amplification
- ▶ Mitochondrial efficiency

RECONSTITUTION & DOSING

VIAL SIZE	10 mg / 5 mg / 10 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	AM or HS
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Executive metabolic/longevity patients 40+.

VIAL SIZE 10mg / 5mg / 10mg	ALPHA MEN'S PRICE \$400	COMPETITOR AVG \$849	PATIENT SAVINGS \$449 (53%)
---------------------------------------	-----------------------------------	--------------------------------	---------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

Recovery & Inflammation • 5mg

ALPHA MEN'S

\$120

OVERVIEW

Body Protection Compound. Accelerates angiogenesis and repair of tendon, ligament, gut, and nervous tissue. The cornerstone recovery peptide.

KEY BENEFITS

- ▶ Tendon/ligament/muscle healing
- ▶ Gut lining repair
- ▶ Anti-inflammatory/neuroprotective
- ▶ Joint function improvement

RECONSTITUTION & DOSING

VIAL SIZE	5 mg or 15 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri

PEP-007a **BPC-157 + TB-500**

Recovery & Inflammation • 5mg / 5mg

ALPHA MEN'S

\$165

OVERVIEW

The gold-standard recovery blend. BPC-157 drives localized repair while TB-500 delivers systemic regeneration.

KEY BENEFITS

- ▶ Comprehensive tissue repair
- ▶ Systemic + local regeneration
- ▶ Athletic and post-injury recovery

RECONSTITUTION & DOSING

VIAL SIZE	5 mg / 5 mg or 15 mg / 15 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	Whenever
DURATION	12 weeks on / 4 weeks off

PEP-007 BPC-157 + TB-500

Recovery & Inflammation • 15mg / 15mg

ALPHA MEN'S

\$250

OVERVIEW

The gold-standard recovery blend. BPC-157 drives localized repair while TB-500 delivers systemic regeneration.

KEY BENEFITS

- ▶ Comprehensive tissue repair
- ▶ Systemic + local regeneration
- ▶ Athletic and post-injury recovery

RECONSTITUTION & DOSING

VIAL SIZE	5 mg / 5 mg or 15 mg / 15 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	Whenever
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Athletes, post-surgical, chronic overuse patients.

VIAL SIZE 15mg / 15mg	ALPHA MEN'S PRICE \$250	COMPETITOR AVG \$649	PATIENT SAVINGS \$399 (61%)
---------------------------------	-----------------------------------	--------------------------------	---------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-008 **BPC-157 + TB-500 + GHK-Cu**

Recovery, Inflammation & Aesthetic • 10mg / 10mg / 50mg

ALPHA MEN'S

\$250

OVERVIEW

Comprehensive healing blend adding GHK-Cu for connective tissue, collagen, and aesthetic outcomes.

KEY BENEFITS

- ▶ Tissue repair + collagen rebuilding
- ▶ Vascular and inflammation modulation
- ▶ Aesthetic recovery outcomes

RECONSTITUTION & DOSING

VIAL SIZE	10 mg / 10 mg / 50 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	Whenever
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Post-surgical, aesthetic recovery, chronic joint patients.

VIAL SIZE 10mg / 10mg / 50mg	ALPHA MEN'S PRICE \$250	COMPETITOR AVG \$679	PATIENT SAVINGS \$429 (63%)
--	-----------------------------------	--------------------------------	---------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-020 **GHK-Cu**

Aesthetic & Healing • 50mg

ALPHA MEN'S

\$155

OVERVIEW

Copper-binding tripeptide. Naturally elevated in young skin, GHK-Cu drives collagen synthesis, modulates inflammation, supports angiogenesis, and improves wound and tissue remodeling — a foundational aesthetic and recovery peptide.

KEY BENEFITS

- ▶ Collagen, elastin, and glycosaminoglycan synthesis
- ▶ Skin firmness, thickness, and tone
- ▶ Hair follicle stimulation and density
- ▶ Anti-inflammatory and antioxidant signaling
- ▶ Wound and tissue remodeling

RECONSTITUTION & DOSING

VIAL SIZE	50 mg
RECONSTITUTION	2 mL bacteriostatic water
DOSE	1–2 mg (4–8 units)
FREQUENCY	3–5× per week
TIMING	AM or PM
DURATION	8–12 week cycles
ROUTE	Subcutaneous

IDEAL CANDIDATE

Men 35+ focused on aesthetic longevity, skin quality, hair density, and recovery support.

VIAL SIZE 50mg	ALPHA MEN'S PRICE \$155	COMPETITOR AVG \$189	PATIENT SAVINGS \$34 (18%)
--------------------------	-----------------------------------	--------------------------------	--------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-031 **KPV**

Inflammation • 5mg

ALPHA MEN'S

\$175

OVERVIEW

Tripeptide derived from alpha-MSH. Strong anti-inflammatory effects, especially in gut and autoimmune-driven inflammation.

KEY BENEFITS

- ▶ Anti-inflammatory cascade modulation
- ▶ Gut/autoimmune support
- ▶ Adjunct in inflammatory protocols

RECONSTITUTION & DOSING

VIAL SIZE	5 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	Whenever
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Men with chronic inflammation, gut or autoimmune complaints.

VIAL SIZE 5mg	ALPHA MEN'S PRICE \$175	COMPETITOR AVG \$279	PATIENT SAVINGS \$104 (37%)
-------------------------	-----------------------------------	--------------------------------	---------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-033 **LL-37**

Post-illness & Inflammation • 5mg

ALPHA MEN'S

\$175

OVERVIEW

Cathelicidin-derived antimicrobial peptide with broad immune-modulating and anti-pathogen activity.

KEY BENEFITS

- ▶ Antimicrobial/antipathogen support
- ▶ Immune modulation
- ▶ Post-viral recovery

RECONSTITUTION & DOSING

VIAL SIZE	5 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	Whenever
DURATION	8 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Post-illness recovery, chronic infections, immune support.

VIAL SIZE 5mg	ALPHA MEN'S PRICE \$175	COMPETITOR AVG \$239	PATIENT SAVINGS \$64 (27%)
-------------------------	-----------------------------------	--------------------------------	--------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-052 **TB-500**

Recovery & Inflammation • 5mg

ALPHA MEN'S

\$180

OVERVIEW

Thymosin Beta-4 fragment. Upregulates actin and drives systemic regeneration — pairs powerfully with BPC-157 for total recovery.

KEY BENEFITS

- ▶ Systemic tissue regeneration
- ▶ Improved flexibility/mobility
- ▶ Anti-inflammatory effects
- ▶ Vascular support

RECONSTITUTION & DOSING

VIAL SIZE	5 mg or 15 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	Whenever
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Post-injury, post-surgery, chronic overuse patients.

VIAL SIZE 5mg	ALPHA MEN'S PRICE \$180	COMPETITOR AVG \$219	PATIENT SAVINGS \$39 (18%)
-------------------------	-----------------------------------	--------------------------------	--------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-053 **TB-500 + BPC-157 + GHK-Cu + KPV**

Recovery & Inflammation • 5mg / 5mg / 5mg / 10mg

ALPHA MEN'S

\$375

OVERVIEW

Comprehensive quad-blend combining regeneration, collagen, and anti-inflammatory action in a single protocol.

KEY BENEFITS

- ▶ Quad-mechanism tissue/inflammation support
- ▶ Simplifies complex recovery protocols

RECONSTITUTION & DOSING

VIAL SIZE	5 mg / 5 mg / 5 mg / 10 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	Whenever
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Patients needing maximum recovery + inflammation coverage.

VIAL SIZE 5mg / 5mg / 5mg / 10mg	ALPHA MEN'S PRICE \$375	COMPETITOR AVG \$649	PATIENT SAVINGS \$274 (42%)
--	-----------------------------------	--------------------------------	---------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-057 Thymosin Alpha-1

Autoimmune & Inflammation • 10mg

ALPHA MEN'S

\$320

OVERVIEW

Thymus-derived peptide that modulates T-cell function and broad immune competence. Used post-illness, for autoimmune, and for resilience protocols.

KEY BENEFITS

- ▶ T-cell regulation and immune modulation
- ▶ Support in autoimmune/inflammatory conditions
- ▶ Post-viral restoration

RECONSTITUTION & DOSING

VIAL SIZE	10 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	Whenever
DURATION	8 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Post-viral, autoimmune, or immune-resilience patients.

VIAL SIZE 10mg	ALPHA MEN'S PRICE \$320	COMPETITOR AVG \$399	PATIENT SAVINGS \$79 (20%)
--------------------------	-----------------------------------	--------------------------------	--------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-059 **Thymosin Alpha-1 + KPV + LL-37**

Inflammation & Illness • 10mg / 10mg / 5mg

ALPHA MEN'S

\$400

OVERVIEW

Triple immune and anti-inflammatory blend — ideal for post-illness, autoimmune, and chronic inflammation protocols. Note: milky appearance.

KEY BENEFITS

- ▶ Immune + anti-inflammatory + antimicrobial
- ▶ Post-illness comprehensive reset

RECONSTITUTION & DOSING

VIAL SIZE	10 mg / 10 mg / 5 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	Whenever
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Post-viral, autoimmune, chronic inflammation patients.

VIAL SIZE 10mg / 10mg / 5mg	ALPHA MEN'S PRICE \$400	COMPETITOR AVG \$799	PATIENT SAVINGS \$399 (50%)
---------------------------------------	-----------------------------------	--------------------------------	---------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-021 GHK-Cu + Epithalon

Longevity & Healing • 50mg / 10mg

ALPHA MEN'S

\$200

OVERVIEW

Aesthetic longevity + telomere support. Combines GHK-Cu's collagen and tissue effects with Epithalon's cellular longevity pathways.

KEY BENEFITS

- ▶ Aesthetic + longevity synergy
- ▶ Collagen rebuild + telomere support

RECONSTITUTION & DOSING

VIAL SIZE	50 mg / 10 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	Whenever
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Aesthetic-longevity-minded men 40+.

VIAL SIZE 50mg / 10mg	ALPHA MEN'S PRICE \$200	COMPETITOR AVG \$329	PATIENT SAVINGS \$129 (39%)
---------------------------------	-----------------------------------	--------------------------------	---------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-022 GHK-Cu + Epithalon + MOTS-C

Longevity, Healing & Cellular • 50mg / 10mg / 10mg

ALPHA MEN'S

\$300

OVERVIEW

Triple longevity blend: aesthetic healing, telomere support, and mitochondrial optimization in one protocol.

KEY BENEFITS

- ▶ Comprehensive longevity pathways
- ▶ Aesthetic + cellular + telomere synergy

RECONSTITUTION & DOSING

VIAL SIZE	50 mg / 10 mg / 10 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	Whenever
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Premium longevity patients committed to daily protocol.

VIAL SIZE	ALPHA MEN'S PRICE	COMPETITOR AVG	PATIENT SAVINGS
50mg / 10mg / 10mg	\$300	\$649	\$349 (54%)

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-035 MOTS-C

Mitochondrial Health • 10mg

ALPHA MEN'S

\$175

OVERVIEW

Mitochondrial-derived peptide encoded in the 12S rRNA. Regulates metabolic homeostasis, exercise adaptation, and insulin sensitivity.

KEY BENEFITS

- ▶ Improved insulin sensitivity
- ▶ Enhanced exercise adaptation
- ▶ Mitochondrial biogenesis

RECONSTITUTION & DOSING

VIAL SIZE	10 mg
RECONSTITUTION	2 mL
DOSE	20 units
FREQUENCY	Mon–Fri
TIMING	AM
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Metabolic optimization, longevity, athletic performance.

VIAL SIZE 10mg	ALPHA MEN'S PRICE \$175	COMPETITOR AVG \$229	PATIENT SAVINGS \$54 (24%)
--------------------------	-----------------------------------	--------------------------------	--------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-036 **NAD+**

Mitochondrial Health • 500mg

ALPHA MEN'S

\$200

OVERVIEW

Foundational coenzyme for mitochondrial function, DNA repair, and sirtuin activation. Direct repletion restores cellular energy and longevity pathways.

KEY BENEFITS

- ▶ Mitochondrial ATP restoration
- ▶ DNA repair / sirtuin activation
- ▶ Cognitive clarity and energy
- ▶ Anti-aging cellular support

RECONSTITUTION & DOSING

VIAL SIZE	500 mg
RECONSTITUTION	6 mL
DOSE	20–100 units
FREQUENCY	Mon–Fri
TIMING	AM
DURATION	In perpetuity on lower doses
ROUTE	Subcutaneous

IDEAL CANDIDATE

Men 35+ focused on longevity, energy, cognition.

VIAL SIZE	ALPHA MEN'S PRICE	COMPETITOR AVG	PATIENT SAVINGS
500mg	\$200	\$269	\$69 (26%)

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-051 **SS-31**

Mitochondrial Health • 10mg

ALPHA MEN'S

\$450

OVERVIEW

Targets inner mitochondrial membrane cardiolipin, stabilizing mitochondrial structure and reducing oxidative stress.

KEY BENEFITS

- ▶ Mitochondrial membrane stabilization
- ▶ Reduced oxidative stress
- ▶ Cellular resilience

RECONSTITUTION & DOSING

VIAL SIZE	10 mg
RECONSTITUTION	2 mL
DOSE	20 units
FREQUENCY	Mon–Fri
TIMING	AM
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Longevity-focused patients, CV-protection-minded men 40+.

VIAL SIZE 10mg	ALPHA MEN'S PRICE \$450	COMPETITOR AVG \$949	PATIENT SAVINGS \$499 (53%)

PEP-023 **Gonadorelin**

Sexual & Reproductive • 5mg

ALPHA MEN'S

\$175

OVERVIEW

Synthetic GnRH. Stimulates pituitary LH/FSH release, preserving testicular function on TRT and supporting fertility.

KEY BENEFITS

- ▶ Testicular function preservation on TRT
- ▶ LH/FSH stimulation
- ▶ Fertility support

RECONSTITUTION & DOSING

VIAL SIZE	5 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	HS
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

TRT patients wanting HPG preservation, fertility protocols.

VIAL SIZE 5mg	ALPHA MEN'S PRICE \$175	COMPETITOR AVG \$209	PATIENT SAVINGS \$34 (16%)
-------------------------	-----------------------------------	--------------------------------	--------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-030 **Kisspeptin**

Endocrine & Reproductive • 10mg

ALPHA MEN'S

\$200

OVERVIEW

Master HPG-axis regulator. Stimulates GnRH release, driving LH/FSH, testosterone production, and spermatogenesis.

KEY BENEFITS

- ▶ Endogenous testosterone amplification
- ▶ Libido and fertility support
- ▶ HPG-axis restoration

RECONSTITUTION & DOSING

VIAL SIZE	10 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	HS
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Men with low libido, low-T, fertility goals, post-cycle.

VIAL SIZE 10mg	ALPHA MEN'S PRICE \$200	COMPETITOR AVG \$239	PATIENT SAVINGS \$39 (16%)
--------------------------	-----------------------------------	--------------------------------	--------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-034 Melanotan-II

Sexual & Skin • 10mg

ALPHA MEN'S

\$140

OVERVIEW

Melanocortin receptor agonist producing increased melanogenesis and libido/arousal effects via central pathways.

KEY BENEFITS

- ▶ Tanning / pigmentation support
- ▶ Libido and arousal effects
- ▶ Appetite suppression (secondary)

RECONSTITUTION & DOSING

VIAL SIZE	10 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	HS
DURATION	12 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Men with specific aesthetic/sexual goals under supervision.

VIAL SIZE 10mg	ALPHA MEN'S PRICE \$140	COMPETITOR AVG \$169	PATIENT SAVINGS \$29 (17%)
--------------------------	-----------------------------------	--------------------------------	--------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-039 **Oxytocin**

Neuro & Sexual • 2mg

ALPHA MEN'S

\$160

OVERVIEW

Mammalian bonding and intimacy hormone. Supports emotional connection, stress modulation, and pro-social response.

KEY BENEFITS

- ▶ Emotional connection and bonding
- ▶ Stress modulation
- ▶ Pro-social and intimacy support

RECONSTITUTION & DOSING

VIAL SIZE	2 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	As needed
TIMING	HS
DURATION	8 weeks on / 4 weeks off
ROUTE	Subcutaneous

IDEAL CANDIDATE

Couples/intimacy-focused protocols, relationship goals.

VIAL SIZE 2mg	ALPHA MEN'S PRICE \$160	COMPETITOR AVG \$189	PATIENT SAVINGS \$29 (15%)
-------------------------	-----------------------------------	--------------------------------	--------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-042 **PT-141**

Sexual & Skin • 10mg

ALPHA MEN'S

\$160

OVERVIEW

Bremelanotide. Central melanocortin receptor agonist — drives libido and arousal via brain pathways independent of vascular function.

KEY BENEFITS

- ▶ Libido restoration
- ▶ Central sexual arousal
- ▶ Works where PDE5 inhibitors don't

RECONSTITUTION & DOSING

VIAL SIZE	10 mg
RECONSTITUTION	2 mL
DOSE	20–50 units
FREQUENCY	As needed
TIMING	HS
DURATION	As needed
ROUTE	Subcutaneous

IDEAL CANDIDATE

Men with desire-phase sexual dysfunction.

VIAL SIZE 10mg	ALPHA MEN'S PRICE \$160	COMPETITOR AVG \$199	PATIENT SAVINGS \$39 (20%)
---------------------------------	--	---------------------------------------	---

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-014 **Dihexa (Oral)**

Neurocognitive • 10mg

ALPHA MEN'S

\$250

OVERVIEW

Angiotensin IV analog. Promotes synaptogenesis and cognitive performance — one of the most potent nootropic peptides in research. Note: carries a milky appearance.

KEY BENEFITS

- ▶ Synaptogenesis promotion
- ▶ Memory and learning enhancement
- ▶ Cognitive performance support

RECONSTITUTION & DOSING

VIAL SIZE	10 mg capsules
RECONSTITUTION	Oral
DOSE	2 capsules
FREQUENCY	Mon–Fri
TIMING	Whenever
DURATION	12 weeks on / 4 weeks off
ROUTE	Oral

IDEAL CANDIDATE

High-demand cognitive professionals, cognitive decline support.

VIAL SIZE 10mg	ALPHA MEN'S PRICE \$250	COMPETITOR AVG \$599	PATIENT SAVINGS \$349 (58%)
--------------------------	-----------------------------------	--------------------------------	---------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-015 **DSIP**

Sleep, Neuro & Psych • 2mg

ALPHA MEN'S

\$100

OVERVIEW

Delta Sleep-Inducing Peptide. Enhances slow-wave sleep depth and modulates stress response.

KEY BENEFITS

- ▶ Deeper slow-wave sleep
- ▶ Stress response modulation
- ▶ Recovery support

RECONSTITUTION & DOSING

VIAL SIZE	2 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri
TIMING	HS
DURATION	8 weeks on / 4 weeks off

PEP-016 DSIP + Semax + Selank

Sleep, Neuro & Psych • 2mg / 10mg / 10mg

ALPHA MEN'S

\$250

OVERVIEW

Comprehensive sleep + cognition + mood blend. DSIP for depth, Semax for clarity, Selank for calm.

KEY BENEFITS

- ▶ Deeper sleep + next-day cognitive clarity
- ▶ Stress and mood regulation
- ▶ Executive performance support

RECONSTITUTION & DOSING

VIAL SIZE	2 mg / 10 mg / 10 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri

Executives, high-stress professionals, cognitive performers.

VIAL SIZE 2mg / 10mg / 10mg	ALPHA MEN'S PRICE \$250	COMPETITOR AVG \$479	PATIENT SAVINGS \$229 (48%)
---------------------------------------	-----------------------------------	--------------------------------	---------------------------------------

Educational use only. Reconstitute with sterile bacteriostatic water. Refrigerate after reconstitution. Use under licensed provider oversight.

PEP-045 **Selank**

Neuropsych • 10mg

ALPHA MEN'S

\$200

OVERVIEW

Heptapeptide anxiolytic. Modulates GABA/serotonin systems to produce calm clarity without sedation or dependence.

KEY BENEFITS

- ▶ Anxiolytic without sedation
- ▶ Stress resilience
- ▶ Focus and cognitive support

RECONSTITUTION & DOSING

VIAL SIZE	10 mg
RECONSTITUTION	2 mL
DOSE	10 units
FREQUENCY	Mon–Fri

Top 10 Stack Protocols

Revenue-engineered combinations for transformation, longevity, recovery, and performance. Each stack pairs complementary mechanisms to multiply outcomes — and ASP — beyond single-peptide protocols.

#1 The Alpha Transformation

ELITE TIER • \$1,499–\$2,199 / month • 6–12 months

GOAL Total body recomposition with preserved performance

COMPONENTS Tirzepatide + CJC-1295/Ipamorelin + BPC-157 + NAD+ SubQ

MECHANISM Tirzepatide drives caloric deficit and visceral fat loss; CJC/Ipa preserves lean mass and accelerates recovery; BPC-157 protects joints and connective tissue under rapid recomposition; NAD+ sustains cellular energy and metabolic efficiency.

OUTCOME Significant fat loss, preserved or increased lean mass, sustained energy, visible physique transformation.

IDEAL Executives and high performers seeking the flagship transformation protocol.

#2 The Executive Longevity Stack

PREMIUM TIER • \$1,099–\$1,599 / month • Ongoing (3-month cycles)

GOAL Sustainable longevity, cognition, and executive performance

COMPONENTS CJC-1295/Ipamorelin + NAD+ IV + Semax + Selank + BPC-157

MECHANISM GH axis optimization restores recovery and body composition; NAD+ drives cellular energy and sirtuin activation; Semax/Selank sharpen cognition under load; BPC-157 maintains joint/tissue resilience.

OUTCOME Sharper thinking, deeper sleep, steady body composition, resilience under stress.

IDEAL Executives, founders, and high-stakes decision-makers aging 40–65.

#3 Ultimate Recovery Protocol

PREMIUM TIER • \$599–\$899 / month • 8–12 weeks

GOAL Accelerated healing from training, injury, or surgery

COMPONENTS BPC-157 + TB-500 + GHK-Cu + CJC-1295/Ipamorelin

MECHANISM BPC-157 targets localized repair; TB-500 circulates for systemic regeneration; GHK-Cu drives connective tissue and scar remodeling; CJC/Ipa amplifies overnight tissue repair via GH.

OUTCOME Faster injury recovery, reduced joint pain, improved mobility, return to full training.

IDEAL Athletes, post-surgical patients, men with chronic tendinopathies or overuse injuries.

#4 Male Sexual Optimization Stack

PREMIUM TIER • \$699–\$999 / month • 3–6 months

GOAL Restored libido, desire, and sexual performance

COMPONENTS PT-141 + Kisspeptin + optimized TRT (as prescribed) + NAD+

MECHANISM PT-141 restores central desire pathways; Kisspeptin amplifies endogenous testosterone and LH/FSH; TRT ensures baseline androgen adequacy; NAD+ supports vascular and cellular energy.

OUTCOME Restored libido, stronger desire, improved performance, confidence.

IDEAL Men 35+ with low libido, desire-phase issues, or suboptimal response to PDE5 inhibitors alone.

#5 Metabolic Reset Protocol

PREMIUM TIER • \$699–\$1,099 / month • 6–12 months

GOAL Reversal of metabolic syndrome and visceral adiposity

COMPONENTS Semaglutide or Tirzepatide + Tesamorelin + NAD+ + GHK-Cu

MECHANISM GLP-1 agent drives appetite regulation and glycemic control; Tesamorelin targets visceral fat specifically; NAD+ restores mitochondrial efficiency; GHK-Cu reduces inflammation and supports vascular health.

OUTCOME Meaningful reduction in visceral fat, improved labs, restored energy.

IDEAL Men with metabolic syndrome, pre-diabetes, or visceral adiposity.

#6 The Alpha Mind Stack

STANDARD TIER • \$349–\$599 / month • Ongoing (4-week cycles with breaks)

GOAL Cognitive performance, focus, and stress resilience

COMPONENTS Semax + Selank + DSIP Blend + NAD+ (optional)

MECHANISM Semax elevates BDNF and sharpens focus; Selank modulates GABA/serotonin for calm clarity; DSIP supports deep sleep; NAD+ underpins mitochondrial cognitive energy.

OUTCOME Sharper attention, improved memory, calmer stress response, sustained cognitive output.

IDEAL Executives, founders, creators, physicians, cognitive-heavy professions.

#7 Body Recomp Foundation Stack

STANDARD TIER • \$499–\$749 / month • 3–6 months

GOAL Lean-mass-preserving fat loss for disciplined patients

COMPONENTS CJC-1295/Ipamorelin + Semaglutide (low dose) + BPC-157

MECHANISM GH axis protects lean mass during caloric deficit; low-dose Semaglutide modulates appetite; BPC-157 protects joints under increased training.

OUTCOME Visible recomposition: reduced body fat, maintained/increased lean mass.

IDEAL Men 30–55 with 10–25 lbs to lose wanting a disciplined, lean-mass-first approach.

#8 Longevity Aesthetic Stack

PREMIUM TIER • \$799–\$1,199 / month • Ongoing

GOAL Look as good as you perform — skin, hair, physique, energy

COMPONENTS GHK-Cu + Epithalon + MOTS-C + CJC/Ipa + NAD+

OUTCOME Improved skin quality, hair density, body composition, aesthetic presentation.

IDEAL Men 40+ focused on aesthetic longevity, executive presence, post-cosmetic.

#9 The Advanced Transformation (Elite Tier)

ELITE TIER • \$1,999–\$2,999 / month • 6–12 months

GOAL Most aggressive medically-supervised transformation available

COMPONENTS Retatrutide + Cagrilintide + CJC/Ipamorelin + NAD+ + BPC-157

MECHANISM Retatrutide's triple-agonist mechanism drives unmatched fat loss; Cagrilintide amplifies satiety; CJC/Ipa preserves muscle; NAD+ sustains cellular energy; BPC-157 protects joints.

OUTCOME Most aggressive and consistent fat loss outcomes; complete metabolic and physique reset.

IDEAL *Patients plateaued on sema/tirz or needing most aggressive intervention. Strict clinical oversight.*

#10 The Alpha Foundation (Entry Stack)

STANDARD TIER • \$349–\$549 / month • 3–6 months

GOAL Foundational peptide therapy entry point

COMPONENTS Sermorelin or Ipamorelin + BPC-157 + NAD+ SubQ (optional)

MECHANISM Gentle GH axis support via Sermorelin/Ipamorelin; BPC-157 for recovery and gut health; NAD+ for foundational cellular energy.

OUTCOME Improved sleep, recovery, body composition, and energy — ideal gateway into peptide therapy.

IDEAL *Men new to peptide therapy, or those wanting a well-tolerated, foundational protocol.*

Wellness & Performance Stacks

Curated bundles built from the formulary above for specific lifestyle and wellness outcomes. Use these to position consumer-friendly entry points alongside the flagship transformation protocols.

WELLNESS CATEGORY STACKS

#W1 Sleep & Stress Reset

WELLNESS • \$249–\$399 / month • 4–8 weeks

GOAL Deeper sleep, calmer nervous system, faster recovery from chronic stress.

COMPONENTS DSIP + Selank

MECHANISM DSIP entrains delta-wave sleep architecture; Selank modulates GABA tone for daytime calm without sedation; results in restorative sleep and reduced cortisol load.

OUTCOME Faster sleep onset, longer deep-sleep windows, lower morning cortisol, steadier mood.

IDEAL High-stress executives, parents of young children, men recovering from burnout.

#W2 Gut & Inflammation Reset

WELLNESS • \$279–\$449 / month • 4–8 weeks

GOAL Heal the gut lining, calm systemic inflammation, restore digestive resilience.

COMPONENTS BPC-157 (Oral) + KPV + Thymosin Alpha-1

MECHANISM Oral BPC-157 acts directly on gut mucosa; KPV downregulates NF-κB and TNF-α; Thymosin Alpha-1 reorients immune balance away from chronic inflammation.

OUTCOME Reduced bloating, improved digestion, lower CRP, fewer flares of food sensitivity.

IDEAL Men with IBS, leaky gut, NSAID-related GI damage, or post-antibiotic dysbiosis.

#W3 Skin, Hair & Aesthetic

WELLNESS • \$349–\$549 / month • Ongoing

GOAL Visible improvement in skin tone, hair density, and aesthetic presentation.

COMPONENTS GHK-Cu + Epithalon

MECHANISM GHK-Cu drives collagen, elastin, and follicular signaling; Epithalon restores telomerase activity for cellular youthfulness; combination delivers measurable aesthetic outcomes within 12 weeks.

OUTCOME Tighter skin, fewer fine lines, denser hair, more even tone — without injectables-first approach.

IDEAL Men 40+ focused on aesthetic longevity, post-procedure recovery, hair-density restoration.

#W4 Immune Resilience

WELLNESS • \$399–\$599 / month • 6–12 weeks

GOAL Strengthen immune surveillance, accelerate recovery from illness, reduce infection frequency.

COMPONENTS **Thymosin Alpha-1 + LL-37 + KPV**

MECHANISM Thymosin Alpha-1 matures and balances T-cell populations; LL-37 provides direct antimicrobial defense; KPV calms residual inflammation post-illness.

OUTCOME Fewer sick days, faster recovery from URIs, more resilient post-travel and post-stress immune state.

IDEAL *Frequent travelers, post-COVID long-haulers, men with autoimmune tendencies.*

MEN'S HEALTH STACKS

#M1 Testosterone Optimization Add-On

MEN'S HEALTH • \$349–\$549 / month • Add-on to TRT

GOAL Preserve fertility, support endogenous testicular function, optimize TRT outcomes.

COMPONENTS Kisspeptin + Gonadorelin + Optimized TRT (as prescribed)

MECHANISM Kisspeptin amplifies upstream HPG-axis signaling; Gonadorelin stimulates LH/FSH release to maintain testicular volume and spermatogenesis on TRT; together they preserve natural endocrine architecture.

OUTCOME Maintained fertility on TRT, preserved testicular volume, improved cycle-off recovery if discontinuing.

IDEAL Men on TRT who want to preserve fertility, younger TRT patients, anyone planning future fertility.

#M2 Erectile & Libido Restoration

MEN'S HEALTH • \$449–\$699 / month • 3–6 months

GOAL Restore desire, central arousal, and erectile function beyond what PDE5 inhibitors provide.

COMPONENTS PT-141 + Oxytocin + Foundation TRT (as prescribed)

MECHANISM PT-141 activates central melanocortin pathways for desire-phase response; Oxytocin enhances bonding and post-orgasmic satisfaction; TRT ensures androgen substrate for full sexual function.

OUTCOME Restored libido, stronger desire, improved erectile response, better intimate connection.

IDEAL Men 35+ with low libido, desire-phase issues, suboptimal Viagra/Cialis response.

#M3 Lean Mass & Strength Foundation

MEN'S HEALTH • \$399–\$649 / month • 3–6 months

GOAL Build lean tissue, protect joints, and support training output without anabolic steroids.

COMPONENTS CJC-1295/Ipamorelin + IGF-1 LR3 (cycled) + BPC-157

MECHANISM GH-axis stimulation drives natural pulsatile GH and IGF-1; cycled IGF-1 LR3 amplifies anabolic response in a controlled window; BPC-157 protects joints under increased training load.

OUTCOME Lean mass gains, faster recovery, joint resilience, sustained training output.

IDEAL Men 30–55 with disciplined training habits looking to add lean mass without TRT escalation.

#M4 Prostate & Pelvic Recovery

MEN'S HEALTH • \$349–\$549 / month • 6–12 weeks

GOAL Recovery support after prostatectomy, pelvic surgery, or chronic pelvic inflammation.

COMPONENTS **BPC-157 + TB-500 + LL-37**

MECHANISM BPC-157 and TB-500 drive localized and systemic tissue regeneration; LL-37 modulates chronic inflammatory and infectious drivers in pelvic tissue; combination supports continence and erectile recovery.

OUTCOME Faster surgical recovery, improved continence trajectory, reduced chronic pelvic pain.

IDEAL *Post-prostatectomy patients, men with chronic prostatitis, post-pelvic-surgery recovery.*

EXECUTIVE PERFORMANCE STACKS

#E1 Cognitive Edge

EXECUTIVE • \$399–\$649 / month • Cycled monthly

GOAL Sharpen focus, accelerate processing speed, sustain cognitive output under high load.

COMPONENTS Semax + Selank + Dihexa (Oral)

MECHANISM Semax elevates BDNF and dopaminergic tone; Selank balances anxiolytic GABA modulation; Dihexa supports synaptogenesis and HGF-pathway plasticity for executive cognition.

OUTCOME Faster decision-making, longer focus windows, reduced mental fatigue, calm clarity under stress.

IDEAL Founders, executives, physicians, traders, and high-output professionals.

#E2 Travel & Jet Lag Reset

EXECUTIVE • \$199–\$349 / use • Per-trip cycle

GOAL Eliminate jet lag, maintain cognitive output across time zones, recover from travel stress.

COMPONENTS DSIP + Selank + NAD+ (optional)

MECHANISM DSIP entrains a forced sleep architecture aligned with destination time; Selank stabilizes anxiety and GI response to schedule disruption; NAD+ accelerates mitochondrial recovery from circadian stress.

OUTCOME Same-day arrival cognitive function, restored sleep on day 1, no productivity gap from travel.

IDEAL Frequent international travelers, board members, consultants, executive teams.

#E3 Stress Resilience & Recovery

EXECUTIVE • \$499–\$799 / month • Ongoing (8-week cycles)

GOAL Buffer against chronic stress, maintain HPA-axis flexibility, sustain energy through high-demand seasons.

COMPONENTS NAD+ + DSIP + Selank + Tesamorelin

MECHANISM NAD+ restores cellular bandwidth; DSIP+Selank protect sleep and stress response; Tesamorelin reduces visceral fat that drives chronic inflammatory signaling — a stack that addresses every system that breaks under sustained executive stress.

OUTCOME Sustained energy, preserved sleep, lower visceral fat, improved cardiometabolic markers.

IDEAL Executives navigating funding rounds, scaling, post-acquisition periods, or high-stakes seasons.

#E4 Peak Performance Pre-Event

EXECUTIVE • \$449–\$699 / cycle • 4-week pre-event ramp

GOAL Peak physical and cognitive output for a defined event — keynote, board meeting, athletic peak, photo shoot.

COMPONENTS **Semax + CJC-1295/Ipamorelin + Oxytocin + DSIP**

MECHANISM Semax sharpens cognition during ramp; CJC/Ipamorelin preserves body composition; Oxytocin supports presence and stage charisma; DSIP locks in pre-event sleep — coordinated for peak day.

OUTCOME Visible energy, sharper presentation, better recovery between sessions, peak day readiness.

IDEAL *Founders raising capital, executives with marquee events, physique competitors, public figures.*

Compliance & Disclaimers

Educational Use Only. This catalog is intended as a clinical reference and educational resource for licensed providers and patients of Alpha Men's Clinic. It is not medical advice and is not intended to diagnose, treat, cure, or prevent any disease.

Provider-Supervised Therapy. All peptide therapies described here must be prescribed, dosed, and monitored by a licensed healthcare provider. Patients should not initiate, modify, or discontinue any protocol without provider guidance.

Individual Results Vary. Outcomes depend on baseline health, adherence, lifestyle, and individual physiology. Statements about outcomes describe typical observed responses in clinical and research contexts and do not guarantee results.

Pricing. Prices reflect Alpha Men's Clinic retail at time of publication and may change. Competitor averages are informational benchmarks compiled from publicly available clinic-tier pricing in the U.S. market.

Reconstitution & Storage. Use only sterile bacteriostatic water for reconstitution. Refrigerate reconstituted product at 2–8 °C and protect from light. Discard any vial that appears cloudy, discolored, or particulate. Follow product-specific shelf life.

Adverse Effects. Report any unexpected side effects, injection-site reactions, or adverse symptoms to your provider promptly. In case of emergency, seek immediate medical care or call 911.

Regulatory Status. Several peptides referenced are research compounds or compounded preparations with regulatory status that varies by jurisdiction. Use is governed by your provider's clinical judgment within the applicable regulatory framework.

Privacy & HIPAA. All patient interactions, ordering, and clinical communications are handled in accordance with HIPAA and Alpha Men's Clinic's privacy practices.
